Source: CFI analysis of data collected by the National Institute on Money in State Politics, see <http://followthemoney.org>

* Maine, Arizona and Connecticut each have public funding programs. These states are shown on two lines, one for the public funding candidates and one for the non-participating candidates.

[#] Wisconsin's calculation does not include out-of-state contributions. Since the recall election of 2012 Wisconsin elections have drawn significant out of state contributions, vastly exceeding what is seen in other states. Limiting it in this way provides for a more reasonable comparison to other states.
